Dark Web – (Red Room Concept)

-M.Y Kichloo - SSP

M.Y Kichloo-SSP

A common man is aware of only visible internet but if we go into details of internet the new things come up which make a normal human being think that humans are impending towards savage and disaster kind of world. To understand the nitty-gritty of internet it is significant to know about types of internet. Internet is categorized into two main types i.e visible & invisible internet.

Visible Internet: -

1. **Surface web:** - is mostly known to all. It is that portion of World Wide Web (internet) that is readily available to the general public and can be searched with standard web search engines. Its web pages are indexed and search engine can let us to access. A common netizens use this internet.
2. **Invisible Internet:** - All the users don't have access to this internet. It is further subdivided into two types: -
3. **Deep Web:** - It is another part of internet which is not illegal but here personal information data/ data of a company/ organization particularly classified documentary/ sensitive documents/ data of Army, Universities etc are kept in safe storage and it cannot be accessed by the search engine, but require specially configured tools/ softwares. Its web pages are not

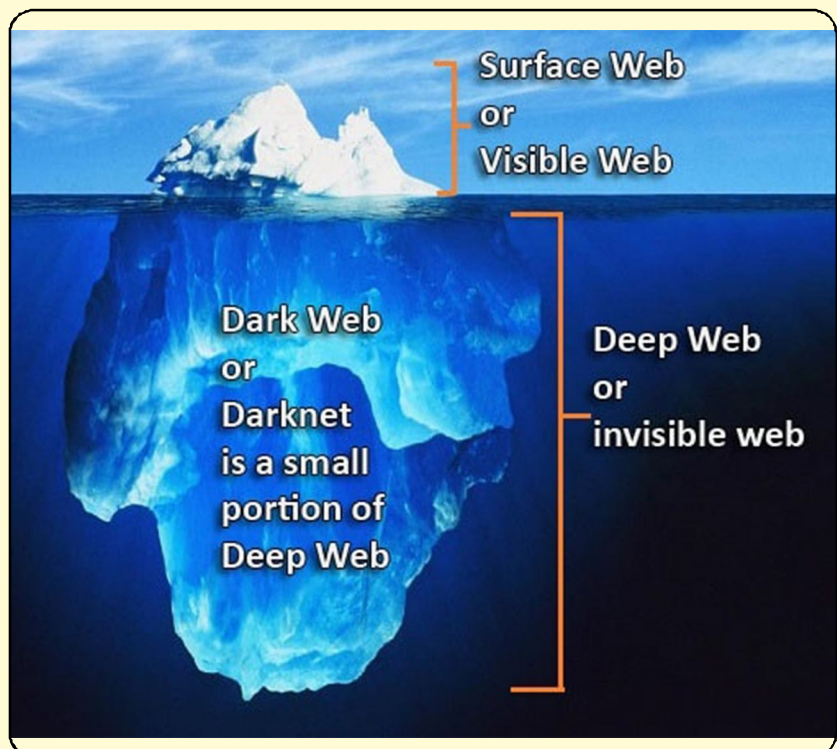

indexed if a user has permission (URL)/ user name and password then it can be accessed.

4. **Dark web/ Dark Net:** - According to researchers only 4% of internet is visible to the general public and remaining 96% constitutes Deep web and dark net. A dark web or dark net has the sites that sell drugs, hacking software, counterfeit money and is a platform for all dangerous criminal activities like murder, immoral activities, Chopping off of body parts etc and the mode of payment is through crypto currency (bit coins). Besides, its access being through TOR Browser is illegal & alarming as without being noticed, the users are generally victim of depression may be having psychological problems (psychopath) who have

sadistic approach to gratify their any greed of what soever nature as if they have vampirish spirits.

5. **Red Room:** - Red Room is another concept here where in live videos are streaming on line or shadow sites with the option of live IRC chats along with Bit Coin payment. Now, does that ring a bell for you? Still no, then now I can explain. You can call red rooms as virtual harassment terminal which includes many of the world's heinous and blatant coercion is being executed lively as per the inflow of bit coins to the organizers, on the orders of members in the live IRC chats.

Red room is the website where viewer is shown video on his demand. It generally contains explicit harassment and torture of subject by

some person of evil intention. First intended viewer will send the email id to website owner. Then website owner will send them the link to pay the charges. User will pay the money and in return will get the access to enter into website. User will use that password and live cam show will be shown to the viewer where some person whose face is hidden behind the mask will show the subjects. The user will demand some action to be done with subjects and that action can be torture, cutting body parts, even torture to death. The higher the torture more the money

demanded. I have come across two cases of real red rooms on deep web. One is of ISIS saying that they will behead the Turkish soldier on some specific date and specific time and it will be live. Other is more horrific than this also.

Second case is "The daisy destruction" which shook the internet world and it is one of the most horrific cases until now of child abuse.

Red room is dangerous place that should be avoided that is my wise advice. I have never seen one and will never see.

Cyber thought.... dear netizens we are gaga about Smartphones and becoming techno savvy/ techno buff transforming our lives into Nomo-phobic world an alarming signal as to playing second fiddle to human relations (compassion/ sympathy/ empathy etc) by indulging willy-nilly into phubbing.... paving a way towards dystopian society... can't we pledge techno camping for some hours a day to act as real humans... regards.

"please don't fall in the trap of darknet-red room"
